PROFESSIONAL SUMMARY

Data Scientist | ML Engineer — Detail-oriented fresher with **2 production-deployed AI systems** (healthcare + cybersecurity), practical experience in deep learning, computer vision, NLP, and MLOps. Proficient in Python, TensorFlow, PyTorch, Docker, and AWS. Passionate about building scalable AI solutions for real-world impact.

SKILLS

Programming Languages : — Python, SQL, JavaScript, **ML and Data** : — Scikit-learn, Pandas, NumPy, NLP, Feature Engineering, Model Evaluation, **Deep Learning** — TensorFlow, Keras, PyTorch, YOLOv8, U-Net, OpenCV, Computer Vision, **MLOps** : — Docker, DVC, MLflow, GitHub Actions, Flask, FastAPI, REST APIs, End-to-end ML Pipelines, **Cloud** — AWS EC2, AWS ECR, AWS S3, DAGsHub, **Visualization** : — Matplotlib, Seaborn, Excel, Power BI, **Web and DB** : — HTML, CSS, Tailwind, JavaScript, MySQL, PostgreSQL

PROJECTS

NeuroScan AI — AI-Powered Brain Tumor Detection & Segmentation System. 🔗 [Live Demo](#) 📄, Python · TensorFlow · PyTorch · YOLOv8 · U-Net · Flask · OpenCV · DVC · Docker · AWS EC2/ECR · CI/CD

- Engineered a **3-stage brain tumor detection pipeline (CNN → YOLOv8x → U-Net)** achieving binary classification, bounding-box localization, and pixel-level segmentation on **BraTS 2021** MRI scans across T1ce, T2, and FLAIR modalities
- Trained **CNN** (91.17% accuracy, 95.97% AUC), **YOLOv8x** (mAP50: 91.9%, mAP50-95: 68.7%), and **U-Net++ ResNet34** (Dice: 0.84, IoU: 0.73) for 3-class tumor detection and 4-class semantic segmentation
- Automated **PDF diagnostic report** generation with patient info, confidence scores, YOLOv8x bounding-box tables, U-Net Dice score, segmentation coverage %, and annotated MRI images using ReportLab
- Containerized with **Docker**, deployed on **AWS EC2** via **GitHub Actions CI/CD**; model weights versioned with **DVC + DagHub - GitHub** 📄

Deep Shield Mail — AI-Powered Email Spam & Phishing Detection - Live Demo 📄, Python · Naive Bayes · TF-IDF · NLP · Flask · MLflow · DVC · Docker · AWS EC2/ECR/S3 · Nginx · CI/CD

- Achieved **97.8% accuracy** and **97.7% F1-score** on spam/phishing detection; selected **Naive Bayes** over **6 algorithms**(SVM, Logistic Regression, Random Forest, XGBoost, Decision Tree) via **MLflow experiment tracking**
- Engineered a **30,012-dimensional feature matrix — TF-IDF (30,000 features) + 12 hand-crafted NLP meta-features**(suspicious links, URL count, HTML tags, uppercase ratio, sender domain match, etc.)
- Designed a **6-stage MLOps pipeline** (Ingestion → Validation → Transformation → Training → Evaluation → Model Pusher) with **DVC versioning** and **AWS S3** remote storage
- Integrated **Gmail OAuth2** for real-time inbox scanning with per-email confidence scores; deployed live via **Docker + AWS EC2 + Nginx SSL - GitHub** 📄

WORK EXPERIENCE

Data Science Trainee, QSpiders Software Training Institute 04/2025 – 03/2026 | Ahmedabad, Gujarat

- Completed 1-year industry-oriented training in **Python, SQL, Data Science, and Machine Learning** covering **5+ core modules**
- Built **3+ hands-on projects** covering end-to-end ML workflows — data preprocessing, model building, and evaluation

EDUCATION

Master of Computer Applications, Gujarat Technological University 2025 – Present | Ahmedabad, Gujarat

Bachelor of Computer Applications, Bhakta Kavi Narsinh Mehta University 2022 – 2025 | Veraval

CERTIFICATIONS

Machine Learning Basics (AWS Foundations), **Data Science & Analytics** 📄 (HP), **Data Visualisation** 📄 (Forage), **SQL and Relational Databases** 📄 (IBM), **Data Analysis with Python** 📄 (IBM), **Data Science Job Simulation** 📄 (Forage)
